

Xinet WebNative Suite Pricing

Xinet® WebNative® Suite is the digital asset management solution that helps you manage your assets and streamline your workflow with expert efficiency. With a robust file server and production engine, an enterprise-strength SQL database, a secure, multi-server asset management system, and hundreds of features that expedite creative and production workflows—WebNative Suite offers value, simplicity and speed. When you bring WebNative Suite on board, your bottom line will thank you.

Xinet WebNative Suite

WebNative Suite includes XTensions for QuarkXPress; plug-ins for Adobe InDesign, Illustrator, and Photoshop; and other client applications designed to enhance local and remote workflows. Four local production users and unlimited Web users are included with the WebNative Suite price.

- WebNative Suite: \$50,000

For information about the technical features included with this pricing, see the Tech Specs page within the Technology section of the Xinet Web site.

Increase Production Users

Groups with larger numbers of production users can add users to their license at any time. The cost to increase a WebNative Suite license from four users to the following number of users is shown below.

Increase from four users to:

- | | |
|----------------------|-----------------------|
| • 6 users: \$2,500 | • 64 users: \$17,000 |
| • 10 users: \$5,000 | • 80 users: \$20,000 |
| • 16 users: \$8,500 | • 100 users: \$22,000 |
| • 24 users: \$10,500 | • 128 users: \$25,000 |
| • 32 users: \$13,000 | • 250 users: \$35,000 |
| • 50 users: \$15,000 | • 500 users: \$45,000 |

Sub-administration Licenses

Optional Sub-administration licenses are available for WebNative Suite, which reduce overhead by granting a limited set of basic administrative powers to some WebNative Suite users.

- Sub-administration license: \$1,500 (per 5-user bundle)

Video for WebNative Suite

Video for WebNative Suite is an optional product that enables previews of most video, audio and HTML formats, and offers a variety of practical features that simplify searching, streamline the review process, reduce overhead, and more. This product can be integrated with a Telestream FlipFactory server.

- Video for WebNative Suite: \$15,000

WebNative Archive

Xinet WebNative Archive for Windows servers is an optional product for WebNative Suite that allows users to archive and restore documents.

- WebNative Archive: \$10,000

Guarantee

All Xinet products on this price list come with a 30-day unconditional money-back guarantee.

Xinet Maintenance Program Pricing and Policies

Continual enrollment in the Xinet® Maintenance Program is the best way for customers to stay current with advances in Xinet software. Benefits, pricing and policies are described here.

First Year Free

The first year of enrollment in the Xinet Maintenance Program is free upon the *initial* purchase of a Xinet server license. Additional products purchased during this 12-month period are included in the one-year term of free enrollment, but do not extend it.

After the first year of free enrollment, membership renewal ensures that customers will stay current with Xinet product upgrades and new features.

Membership Benefits

Customers enrolled in the Xinet Maintenance Program are entitled to receive all new product updates, feature enhancements, patches, and software bug-fixes released by Xinet during the membership term. Enroll now and enjoy the following benefits:

No-cost license transfer between servers: Should hardware upgrade or replacement become necessary, customers with a current Maintenance membership may transfer their Xinet software license from one server platform to another with no additional charge.

Quick 24/7 access to upgrades: Xinet provides its most recent software releases for downloading from the secure Customer Support area of the Xinet Web site: www.xinet.com.

Convenient library of technical information: Current Software Administration Guides and manuals, the Xinet library of TechNotes, and other product materials are available on-line as well.

Eighteen hours of worldwide support: Xinet provides eighteen continuous hours of expert technical support around the world, from two locations—our corporate headquarters in Berkeley, California from 6:00 AM to 6:00 PM PST, and our European office in Munich, Germany from 9:00 AM to 5:00 PM CET.

Direct contact with Xinet engineers: The Xinet Maintenance Program offers a forum for asking questions and exchanging information with Xinet engineering and technical support staff. These technical services, provided directly by Xinet, complement the extensive front-line support offered to customers from their Authorized Xinet Integrators (AXIs), who are fully trained by Xinet on software installation and administration issues.

Membership Renewal Pricing and Policies

To stay current with Xinet product upgrades and to avoid unnecessary upgrade fees, we encourage you to keep your license enrollment up-to-date. To renew membership in the Maintenance Program, contact Xinet today.

Annual cost: The annual cost to enroll in the Xinet Maintenance Program (after the first year) is:

- 15% of the list price of all licensed Xinet products
- 20% of the list price of all licensed Xinet products (when license includes optional PC support)

Renewals and upgrade fees: Customers have up to 30 days after enrollment expires to renew membership with no penalty. After this 30-day grace period, the following renewal fees apply:

- 20% of the list price of all licensed Xinet products will be charged as a late enrollment fee—in addition to the annual renewal cost above
- 45% of the list price of all licensed Xinet products will be charged for upgrade and re-enrollment once Xinet has issued a major software release (e.g. version 15.x to 16.0)—this includes the annual renewal cost above

If your Maintenance Program enrollment has expired and you want to re-enroll or purchase product upgrades, contact Xinet for more information.

Adding products to a license: Customers must be currently enrolled in the Maintenance Program before purchasing new products or adding production users to their server software license. Maintenance for each additional purchase is included free of charge for the remainder of that year's Maintenance term. Upon the next annual renewal, the cost of Maintenance will be based on the entire set of licensed products.

Multi-year support: Customers who want to lock in current annual rates for their license can do so by purchasing up to five years of Maintenance Program membership in advance. Maintenance fees for additional products purchased during the multi-year period are due at the time of licensing and are prorated to match the license's existing Maintenance Program expiration date.
