Xinet Releases FullPress Version 12
Many New Features for Industry Workhorse

BERKELEY, CA - February 10, 2004 - Leading up to drupa 2004, Xinet, Inc. has released FullPress 12, the latest upgrade to the server software engine that has led the industry since its introduction in 1995.

"FullPress 12 gives our customers a complete PDF workflow and prepress server solution," said Xinet CEO Scott Seebass. "Every enhancement we make is guided by our customers' requests, and is designed to increase customers' capacity and revenues with fewer resources."

In continuing development since 1995, FullPress constitutes the backbone of the prepress workflow for thousands of customers worldwide. As technology has changed, Xinet has consistently targeted its products to help customers of all sizes remain competitive.

FullPress 12 includes easy administration of PDF creation queues, plus expanded functionality for better integration with applications such as Adobe® Illustrator® and Adobe® InDesign®.

For companies providing PDF files as final output, Xinet's FullPress has the simplest automated PDF creation in the industry, tailored to exact production needs. Users can create and automatically pre-flight PDF files simply by printing.

FullPress 12 adds both simple, pre-configured settings for generating industry-standard PDFs (PDF X1a, Pass4Press, etc.) and a powerful interface for customizing creation of PDF files. Additional features such as verifying ink densities in images were added to the in-line preflight stage.

For companies who receive PDF files from their customers, FullPress enables easy placement use of PDF files within layout and imposition applications.

These features expand FullPress' long-standing functions: client-server file sharing, print spooling, color conversion, image scaling and sharpening, and automated output generation of PostScript, PDF, and TIFF/IT files.

FullPress' companion product, WebNative®, is an Internet-based asset management and collaboration system. WebNative® Venture combines an SQL database with WebNative to provide a powerful asset management platform.

More Layout Software Options

Xinet products are used in diverse industries around the world, and those customers have different needs in their layout software. Xinet consistently provides solutions that increase productivity for a wide range of diverse workflows and markets.

A prime example is Picture Wrangler®, provided with the FullPress server package. Picture Wrangler increases the speed and reliability of re-linking jobs that come from off-site.

FullPress version 12 brings this functionality to a much wider audience with the introduction of a Picture Wrangler® application for Adobe® Illustrator® users, a Picture Wrangler plug-in to support InDesign®, and continued support for the already extremely popular Picture Wrangler for QuarkXPress®.

Faster file access with Contextual Menus

Also included in this newest version of FullPress is Xinet CM, a new Contextual Menu extension that gives shortcuts to both FullPress and WebNative users working with files from their FullPress server. Operators access high-resolution and FPO versions of files with one simple click, even within deep and elaborate hierarchies.

About Xinet, Inc.

Xinet has developed image server software for the graphic arts, communications, publishing and printing industries since 1991. Now the de facto standard among advertising agencies worldwide, the Xinet WebNative platform is the only digital asset management system that offers a dynamic production workflow toolset.

With its integrated database that speeds search and retrieval of assets, Xinet WebNative also creates automated, metadata-driven workflows. Through a browser-based interface accessible over the network or over the Internet, Xinet WebNative marries dynamic content distribution and manufacturing systems into one powerful asset management tool used globally by top marketers.

Xinet's customers include: BBDO, Draft FCB Group, Lowe Worldwide, McCann Erickson, Ogilvy & Mather, TBWA Worldwide, TracyLocke; Macy's, Jarden Corp./Sunbeam, Otto Versand; *Fortune*, *Sports Illustrated*, *Time*; and Quebecor World.

Xinet's worldwide headquarters is in Berkeley, Calif.; its European office is in Munich. Xinet, FullPress and WebNative are registered trademarks of Xinet, Inc.
