Xinet's FullPress XT Arrives for QuarkXPress 6

DENVER – November 18, 2003 – Quark Inc. and Xinet Inc. today announced the release of Xinet's FullPress XTensions module with support of QuarkXPress 6. Now prepress and printing customers can use the FullPress XTensions module to integrate QuarkXPress, the most widely used page layout tool in the world, with a server-based workflow to create seamless PDF/X-1a files.

" The FullPress XT and QuarkXPress 6 are part of a new workflow we're configuring here, and they are great. Again Xinet has demonstrated that it is a good business partner with a very reliable and up to date product," said Luc Villeneuve, V.P. Technologies at Caractéra Inc., a commercial printing company with 115 employees in Montreal and Quebec City that specializes in pre-media, Web design, and Web hosting. "Buying FullPress was the single best decision in my technological career."

" Xinet is one of the top prepress vendors, and we have many customers who have been anxiously awaiting this release," said Jürgen Kurz, senior vice president of product development at Quark. "FullPress is great software and we're thrilled to see it released for QuarkXPress 6."

Leading the industry since 1985, FullPress is a robust server software engine that sits at the center of the prepress workflow, providing client-server file sharing, print spooling, and automated output generation of PostScript, PDF, and TIFF/IT.

" Together, FullPress and QuarkXPress 6 give our customers a powerful software tool that speeds production, creates perfect PDF/X-1a files and colorizes 1-bit logos," said Xinet CEO Scott Seebass.

About Xinet, Inc.

Xinet has developed image server software for the graphic arts, communications, publishing and printing industries since 1991. Now the de facto standard among advertising agencies worldwide, the Xinet WebNative platform is the only digital asset management system that offers a dynamic production workflow toolset.

With its integrated database that speeds search and retrieval of assets, Xinet WebNative also creates automated, metadata-driven workflows. Through a browser-based interface accessible over the network or over the Internet, Xinet WebNative marries dynamic content distribution and manufacturing systems into one powerful asset management tool used globally by top marketers.

Xinet's customers include: BBDO, Draft FCB Group, Lowe Worldwide, McCann Erickson, Ogilvy & Mather, TBWA Worldwide, TracyLocke; Macy's, Jarden Corp./Sunbeam, Otto Versand; *Fortune*, *Sports Illustrated*, *Time*; and Quebecor World.

Xinet's worldwide headquarters is in Berkeley, Calif.; its European office is in Munich. Xinet, FullPress and WebNative are registered trademarks of Xinet, Inc.
